# WHAT'S NEW?

page 34

## PAPER FOOD BOWLS

These round paper food bowls with PLA lining are suitable for a variety of hot and cold dishes such as gourmet salads, steaming curries or fresh Poke bowls. The paper lids for hot dishes have ventilation holes. For optimal presentation, use the PLA or RPET lid that provides a good view of the dish.

**EPBSC32SE01**

# OUR TWO PRODUCT LINES

## GreenStripe® - Renewable & Compostable

- Made from renewable plant materials that can be grown again and again.
- Not made from oil like traditional plastics. All GreenStripe® products are compostable, which means they can be returned to the soil to help plants grow.
- Compostable GreenStripe® products are ASTM compliant and BPI or EN13432 certified compostable in commercial facilities only, which may not exist in your area.
- Not suitable for backyard composting. These products need the high heat of a commercial pile to break down.
- Paper and Bagasse products can go in the freezer, although they are not airtight, so freshness and freezer burn can become issues if left there for too long. PLA can become brittle when frozen, so we don't recommend putting these products in the freezer.

## BlueStripe® - Made with Recycled Content

- Made from post-consumer recycled materials that have been used, recycled, and repurposed, meaning fewer virgin resources are required and less landfill waste is created.
- Making new products from recycled materials helps drive recycling markets and infrastructure.
- RPET can become brittle when frozen, so we don't recommend putting these products in the freezer.
- BlueStripe® RPET products can't be recycled in most communities, but check with yours to find out what they'll accept.
- BlueStripe® products incorporate the highest amount of post-consumer recycled material available without compromising performance.

### Product features

# DINNERWARE

## Plates and Bowls

Renewable & compostable bagasse dinnerware is designed to be strong as well as grease and cut resistant. Sturdy and versatile, these plates and bowls work well for a wide variety of foods. They're the ideal alternative to traditional plastics or polystyrene, because they're made from reclaimed and rapidly renewable bagasse fibers. VANGUARD™ is EN13432 certified compostable.

## Dahlia™ Plates and Bowl

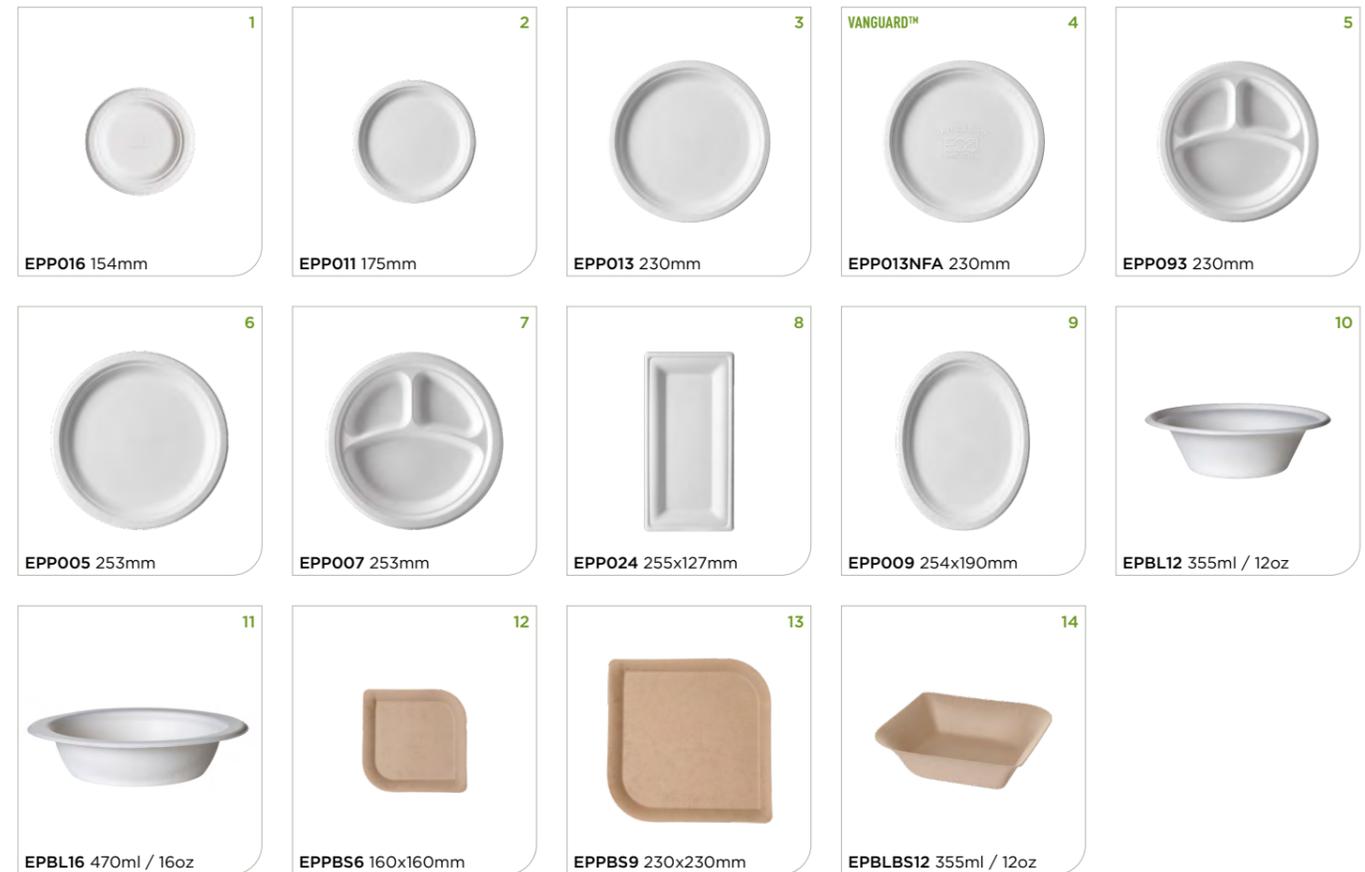

Our Dahlia™ Dinnerware is made with a premium blend of bagasse and bamboo for a unique and undeniably green look. We've designed these plates and bowls in our signature leaf shape for that extra special touch.

# CUTLERY

## ■ Wooden Cutlery

Renewable & compostable wood cutlery is a natural choice for your renewable dinnerware selection. Enjoy both hot and cold foods in comfort and style, for everything from soup to salad. These utensils won't warp, disintegrate, or melt when used with piping hot dishes. Made from FSC® certified birchwood. Wrapped products give an additional level of hygiene and the paper wrapper is plastic free and compostable.

■ **WorldView™ Take-Out Containers**

Our WorldView™ containers combine bagasse bases with PLA, RPET or bagasse lids for maximum strength and optimum presentation. Renewable and compostable PLA lids are perfect for cold foods, while our RPET lids are made with a minimum of 70% post-consumer recycled content and work equally well for hot or cold dishes. Available in a variety of shapes and sizes. PLA lids are EN13432 certified compostable.

### ■ Bagasse Food Trays

Bagasse food trays from Eco-Products™ are strong, grease and cut resistant. Made with renewable materials these trays are perfect for fridge or freezer application for any food item you're packaging and selling.

# CLEAR GRAB & GO CONTAINERS

## ■ Clear Grab & Go containers

Renewable & compostable containers are a more sustainable choice for serving a variety of cold foods. Made from PLA, a plant-based plastic, they are as strong and durable as their traditional counterparts, but don't rely on oil-based plastics. These containers are renewable and EN13432 or BPI-certified compostable.

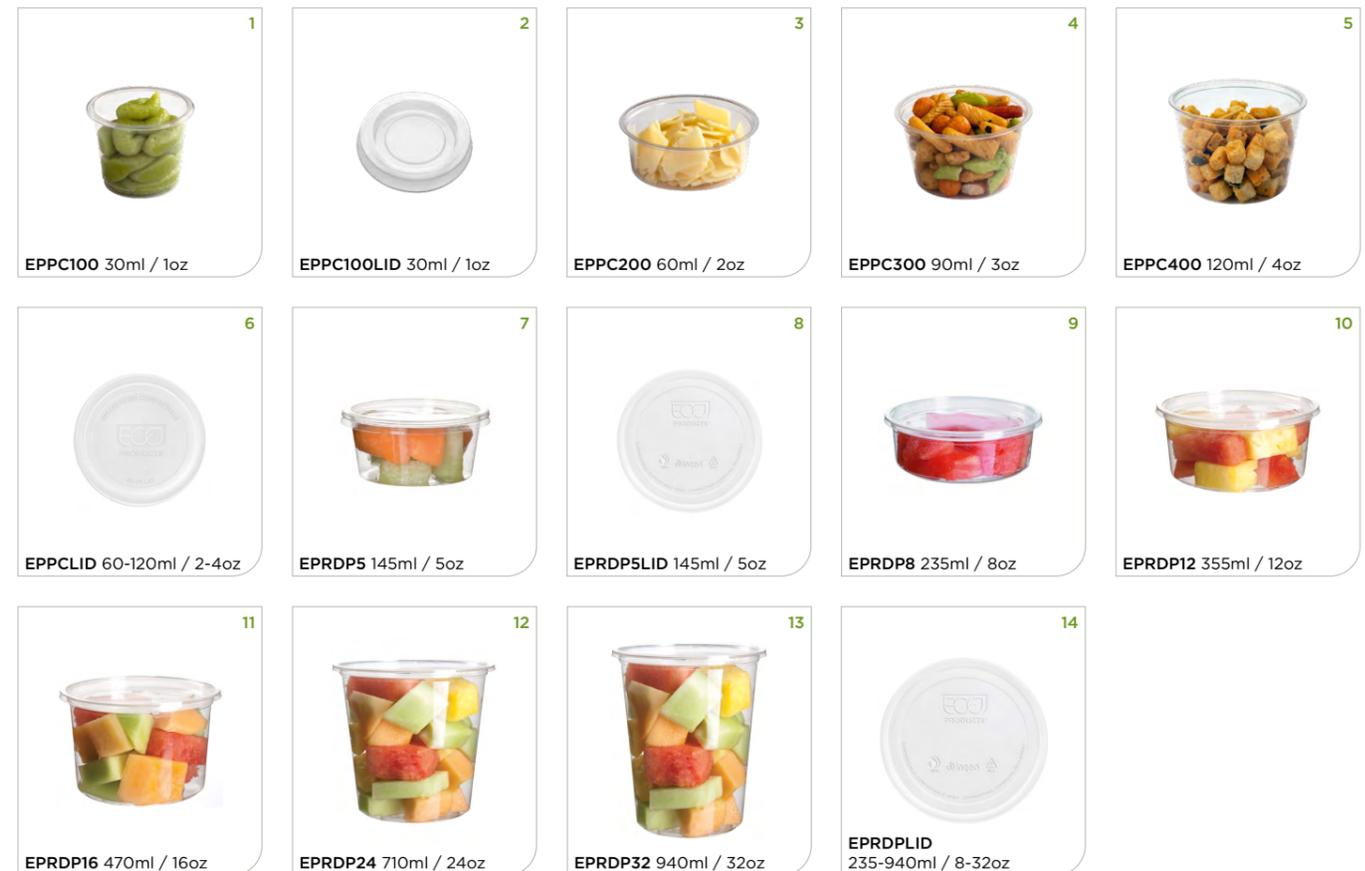

## Portion Cups

#	Product code	Product	Material	Diameter Ø (mm)	Capacity	Qty/case
Cups and Lids						
1	EPPC100	portion cup	PLA	45	30ml / 1oz	5000

PLA dome lid: cold food only

**Paper Food Bowls & Lids**

These round paper food bowls with PLA lining are suitable for a variety of hot and cold dishes such as gourmet salads, steaming curries or fresh Poke bowls. The paper lids for hot dishes have ventilation holes. For optimal presentation and visibility, use the PLA or RPET lid that provides a good view of the dish.

PLA window bag: cold food only

**Paper Eco Wraps**

The benefits speak for themselves; less packaging material due to a low grammage compared to clamshells, bags and other alternatives. The PEFC certified paper with grease and moisture resistant properties (without relying on conventional PFAS) is 98% compostable. The printing with food-safe water-based ink ensures a food-safe product. These multi-functional sheets complement any product line-up. Use them to wrap sandwiches, line baskets, weigh food, and more.

# DRINKING CUPS

### Choose the correct region version

The SUPD requires all hot cups and cold cups to display a marking, which details whether there is plastic in the product or the product is made from plastic. The materials we use haven't changed, our PLA lined hot cups are still compostable and our cold cups are still made from PLA. The marking must be displayed with text in the official language of the member state where the product will be sold to end users.

Therefore we have introduced three designs to cover the member states in which we operate, a map of the regions and corresponding language is on the left page. The suffix (last letter) of each code represents the region A, B or C.

### ■ Paper Hot Cups

These paper cups meet the EU Single Use Plastics Directive (SUPD). The materials we use have not changed, our hot cups are still made from renewable materials with a PLA liner and are EN13432 certified compostable.

#### DRINKING CUPS

# CUSTOMISATION

■ Customised prints are a great way for you to promote your organisation, brand or event while also encouraging waste diversion, sustainability and smart purchasing.

## ■ Customised Product Development

Ready to go beyond simple customisation? By customising your shapes, you can meet your packaging and branding needs better than through customised printing alone. Our experienced design team can help you create a tailor-made product to serve your food with flair without sacrificing functionality.

## ■ Customised Printing & Embossing

Your food isn't generic, so why should your packaging be? No need to use off-the-shelf products that anyone can use - you can build your brand with customised prints and embossing. With more than 60 customisable products to choose from, set yourself apart with a customised packaging suite. See page 51/52.

Cold Cups	7, 9, 10, 12, 16, 20, 24oz	-	1-4 spot

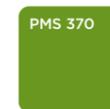

## CMYK Colour

If an artwork has gradients, blends or shadows, or if it is made up of a multitude of colours in the same way as a photo, CMYK is the way to go. Cyan, Magenta, Yellow and Black ink can be combined in different quantities to achieve millions of colours. This is the default method for our paper products, because the minimums are lower while being faster and less expensive.

## Spot Colour

If your cup design has just a few solid colours, then using spot colour is the simplest way to go. The colours match better, because the vendors use a specific colour of ink rather than blending inks to build the colours. This is the only option when printing on our bagasse or clear PLA products.

# Custom Emboss

Product	Code/Sizes	Tool Type
<b>Dinnerware</b>		
Bagasse Plates	All Sizes	Insert
Bagasse Lids Portion Cups	All Sizes	Insert
Bagasse Bowls (White or Natural)**	All Coupe and Noodle	Insert

### ■ Customised Life Cycle Assessment

Want to know the carbon footprint of your Eco-Products®? We can generate a report outlining the carbon, energy, and life cycle data for the products you use. Improve your environmental initiatives, track your numbers, and show your customers your commitment to sustainability with a customised Life Cycle Assessment Report. Contact us at: [ec.info@novolex.com](mailto:ec.info@novolex.com)

### ■ Training

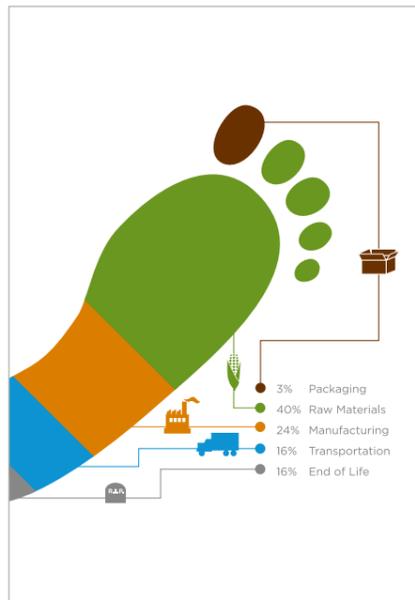

We know a term like 'sustainable disposables' might sound like an oxymoron, and if you are just getting to know us, there's a lot of information to take in. We've created a bunch of interactive training modules and videos to help you learn more about us, our products and sustainability topics in general. Not to mention the Greenology section of our website, FAQs and download library! We also have our very own Sustainability Maven so if you ever have a question, contact us at: [ec.info@novolex.com](mailto:ec.info@novolex.com)

### ■ Zero-waste Consulting

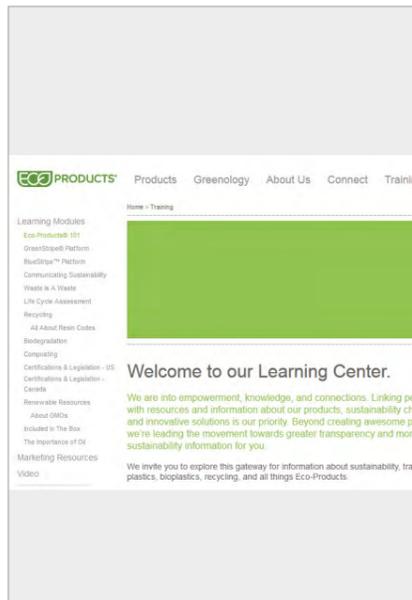

If you're interested in waste diversion but launching a composting strategy or increasing your recycling rates seems daunting, fear not! We've been at this for a while now. From small cafés to large stadiums, chances are we've seen a situation like yours before and can help you navigate the waters of haulers, composters, best bin practices and the like. Don't go at it alone, we got this. Contact us at: [ec.info@novolex.com](mailto:ec.info@novolex.com)

### ■ Video Production

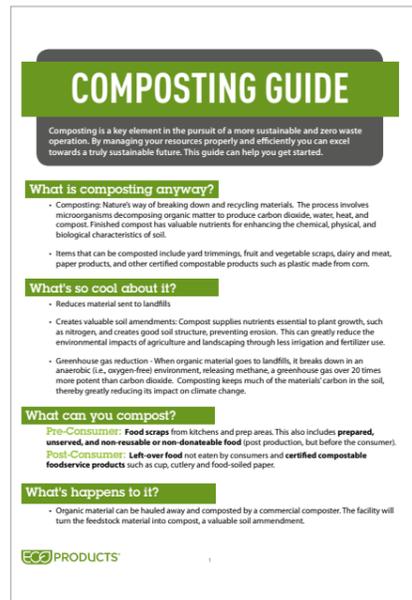

In the age of the viral video, there's no denying that video is a powerful communication tool. We can help you harness that power. Our in-house team can shoot, process, edit and publish your video project. Whether it's a case study to publicize your sustainability efforts or a training video for your employees, let us help. Check out our past projects on our YouTube channel: [youtube.com/user/greenisallwedo](https://youtube.com/user/greenisallwedo)

# Put waste to work™

You eat. You breathe. You live.

You create waste.

We get it, you're human.

Waste is a human creation.

And it doesn't have to go to waste.

It can be turned into something valuable.

So let's start to rethink the way we dispose of food waste.
